

Smith Family Awards Program for Excellence in Biomedical Research

A PROGRAM OF THE RICHARD AND SUSAN SMITH FAMILY FOUNDATION

Alumni Directory

1992 - 2022

Updated, 4/2022

The Richard and Susan Smith Family Foundation is committed to effecting permanent positive change in the lives of the residents of Greater Boston, particularly individuals and families in economically disadvantaged communities. Today, three generations of the Smith family oversee the Foundation, stewarding approximately \$15 million annually in grants aimed at promoting greater health, educational attainment, and economic mobility. In the area of health, the Foundation supports the advancement of biomedical research and the expansion of access to high-quality health care at safety net institutions serving low-income individuals and communities of Greater Boston.

In 1991, the Smith Family Foundation contracted with The Medical Foundation at Health Resources in Action to create a grantmaking program that would identify and support promising junior faculty to find breakthroughs in such areas as AIDS/HIV, cancer, heart disease, diabetes or neuroscience. Since 2008, the Award has broadened to support newly independent faculty engaged in basic biomedical science as well as physics, chemistry and engineering with a focus on biomedicine. The Awards are currently in the amount of \$300,000 over three years.

Over the past 30 years, the Smith Family Awards Program for Excellence in Biomedical Research has helped launch the careers of 187 outstanding scientists with support totaling \$40.1 million.

The following is a listing of all Award Recipients in alphabetical order with current contact information as well as the title of the funded research project. The Smith Family is extraordinarily proud of the accomplishments of its Awardees and is honored to provide the critical support for their newly established research programs.

Cristina Aguayo-Mazzucato, M.D., Ph.D.
(2021 Award Recipient)
Targeting Beta-Cell Senescence in Diabetes
Joslin Diabetes Center
cristina.aguayo-mazzucato@joslin.harvard.edu

Judith Agudo, Ph.D.
(2019 Award Recipient)
Novel platform to increase dendritic cell function and antigen-specific T cell responses to cancer
Dana-Farber Cancer Institute
Judith_Agudo@dfci.harvard.edu

Mark L. Andermann, Ph.D.
(2012 Award Recipient)
Cortical Networks Guiding Hunger-Dependent Attention to Food Cues
Beth Israel Deaconess Medical Center
manderma@bidmc.harvard.edu

Zolt P. Arany, M.D., Ph.D.
(2008 Award Recipient)
Peroxisome Proliferator-Activated Receptor Gamma 1alpha (PGC-1alpha) and Cardiac Angiogenesis
University of Pennsylvania
zarany@mail.med.upenn.edu

Scott A. Armstrong, M.D., Ph.D.
(2004 Award Recipient)
Multi-step Pathogenesis of MLL-rearranged Leukemias
Memorial Sloan-Kettering Cancer Center
armstros@mskcc.org

Emily Patricia Balskus, Ph.D.
(2011 Award Recipient)
Understanding and Preventing the Production of Disease-Associated Metabolites by the Human Gut Microbiota
Harvard University
balskus@chemistry.harvard.edu

Jennifer Benanti, Ph.D.
(2011 Award Recipient)
Mapping the Proteolytic Regulatory Network that Controls Cell Division
University of Massachusetts Medical School
Jennifer.Benanti@umassmed.edu

Leslie J. Berg, Ph.D.
(1993 Award Recipient)
Analysis of the Tsk tyrosine Kinase in Transgenic Mice
University of Massachusetts Medical School
leslie.berg@umassmed.edu

Sudha Biddinger, M.D., Ph.D.
(2010 Award Recipient)
Regulation of the LDLR by Insulin and Diabetes
Boston Children's Hospital
sudha.biddinger@childrens.harvard.edu

Jonathan S. Bogan, M.D.
(2000 Award Recipient)
Role of ARF Proteins in GLUT4 Trafficking
Yale School of Medicine
jonathan.bogan@yale.edu

Laurie A. Boyer, Ph.D.
(2009 Award Recipient)
Non-coding RNA as a Regulator of Cell Fate through Functional Interaction with Polycomb Group Proteins
Massachusetts Institute of Technology
lboyer@mit.edu

James E. Bradner, M.D.
(2010 Award Recipient)
Chemical Inhibition of Bromodomains in Cancer
Novartis Institutes of BioMedical Research
James.bradner@novartis.com

David K Breslow, Ph.D.

(2018 Award Recipient)

Deconstructing the Cellular Antenna: Primary Cilium Disassembly and Control of Cell Growth

Yale University
