Dr. Ralph and Marian Falk Medical Research Trust Awards Programs - Transformational Award

Frequently Asked Questions   Grant Cycle 2026

Contents

General

What is the goal of the Falk Trust Transformational Award?
Following a successful Catalyst Award, the Transformational Award is designed to support translational research projects that address critical scientific and therapeutic roadblocks. The Transformational Award provides a bridge to move an exciting health care innovation to the next step in commercial development.

What types of proposals will be most competitive?
The Falk Trust is interested in transformational efforts to cure disease and reduce suffering. Therefore, proposals that seek to move a basic science insight toward a solution, technique, or tool that can be transferred to clinical practice *in the near term* will be most competitive. Proposals that may realistically result in products or ideas that will be available for technology transfer by the end of the Catalyst/Transformational awards cycle are most likely to gather positive reviews. The proposed benchmarks and milestones outlined in the Catalyst Award proposal must have been successfully achieved. Completion of the Catalyst project on time and on budget is considered favorably. The reviewers include professionals with translational expertise such as academic researchers, venture capital investors, and biotech executives. For those investigators who have previous experience with NIH awards, this is more similar to the small business innovation research award program than to an R01 mechanism.

How do I apply?
Please go to https://hria.org/grants/FalkTAP and download the Program Guidelines and Application Templates. Applicants will submit their proposals in the HRiA Award Manager: https://hria.us-1.smartsimple.com/. Detailed instructions for how to register for and use the Award Manager can also be found on the website.

Eligibility

As a Catalyst Awardee, when am I eligible to apply for the Transformational Program?
Catalyst Awardees are encouraged to apply for the Transformational Award if the proposed benchmarks and milestones outlined in their Catalyst Awards have been successfully achieved. To maintain momentum, Catalyst Awardees with grants in progress who have hit their Catalyst milestones and benchmarks earlier than the official end date, or who are clearly on track to hit these, are welcome to apply. Otherwise, Applicants may first apply during the final year of their Catalyst Award, or the year following. Unsuccessful Transformational program Applicants will be allowed to resubmit one time in the subsequent cycle. For example, Applicants will be eligible to apply for the 2026 Falk Transformational Program if their Catalyst Award ends between November 2025 and February 2027, or if they applied to the program for the first time last year and their application was not funded.

My Transformational Award proposal was declined for funding in the last cycle. May I apply again in this cycle?

Yes, as of 2025, unsuccessful applicants from the prior Transformational Award cycle may reapply one time in the subsequent cycle. A high-level description of the issues that were raised previously by reviewers and how those concerns were addressed in the current proposal is required.

Is there a limit on how many applications in one cycle may be submitted from one applicant?
Yes, one application per Principal Investigator (PI) or multi-PI.

I am based at an institution outside of the United States. Am I eligible?
No, lead applicants do not have to be U.S. citizens but they must hold a faculty appointment at an invited non-profit, academic, medical, or research institution in the United States.

May a PI on one grant also be part of another grant submission?
Yes, a PI on one grant may be listed as personnel on someone else's grant but not in a major role such as multi-PI. It is acceptable to have a role as collaborator or other personnel within the same cycle.

I am Adjunct Faculty at my institution. May I apply as a lead applicant?
No, the program only accepts applications from full-time independent faculty members.

May I submit a project that involves human subjects?
Yes, investigator-initiated trials are allowed under strict criteria. Please see the Research Focus section of the guidelines for more information. Additionally, basic research using human specimens is eligible.

If I am offered the Award but cannot accept it, may it be transferred to a collaborator or other individual significantly involved in the project?

No, the grant can only be awarded to the PI or multi-PIs who originally submitted the grant application.

Am I still eligible to apply if I have moved to a new institution?
Maybe. The administrative lead applicant must hold a full-time faculty appointment at one of the institutions eligible to apply for the Catalyst Program. If your new institution is eligible, you would remain eligible to apply for the Transformational Program. Only the administrative lead applicant must be at an eligible institution, so awards with multi-PIs could still apply if the administrative lead applicant is changed to one of the other multi-PIs that remain at an eligible institution.

Proposal and Application

Are there formatting rules for the Research Proposal?
Yes, please refer to the Guidelines and Application Templates for specific instructions.

Should the references be placed after the Research Proposal?
Yes, please add any references cited after the research proposal. The bibliography of references related to the project are excluded from the word count and page limit maximums.

Are the section headings mentioned in the Research Proposal portion required or may other headings be included?
Yes, please prepare your proposal using the headings in the Guidelines and Application Template.

Do you have a Biosketch form I should use?
Yes, please use the current NIH form for your Biographical Sketch (NIH Biographical Sketch Common Form). Older Biosketch formats will still be accepted for the 2026 program.

I have a multi-PI. Should their Biosketch be included in the Attachment?
Yes, please include Biosketch(es) for any multi-PIs.

How should the multi-PIs be reflected in the proposal?
Key personnel should be listed in the online applications and on the first page of the research proposal. In addition, multi-PIs' Biosketch(es) should be uploaded in the online portal (Collaborator Biosketche(es) are not required) and all of the key personnel should be listed with their roles in the "Investigative team" section of the research proposal. Projects with multi-PIs also require a "management plan" in the proposal. Current and pending support for all multi-PIs should also be provided within the budget spreadsheet.

Where do I find the Application Form templates?
The Application form templates are downloadable documents found at:
https://hria.org/grants/FalkTAP.

Can the start date of the award be adjusted?
Yes, an award recipient may postpone the start date for up to three months. Longer delays must be approved and will only be allowed under exceptional circumstances.

May I use the NIH Current and Pending Support Form?
For each source of funding, please transfer the information from the NIH form to the Other Support section of the Budget Form provided with the application. Please include current and pending support for the Lead PI and any multi-PIs, and for any collaborators who are Key Personnel and have funding related to the proposed project.

How much money will be given each year of the award and how should I budget accordingly?
We typically encourage applicants to split the budget evenly between award years. However, the Applicant may request more money in a particular year of the award if they have a justifiable reason. This information will be available to the reviewers so a detailed justification should be made explaining why this is necessary.

Is the project budget subject to the NIH salary cap requirements?
Yes, the compensation for individuals funded by Falk awards cannot exceed the NIH salary cap. For individuals whose institutional salary exceeds the applicable rate, the amount of salary charged to the Falk award must be limited to their percent effort multiplied by the salary cap rate. Salaries must be in proportion to the percent effort on the research project; however, percent effort may exceed the percent of total salary support requested from the Program. If the requested salary for any personnel listed on the proposal exceeds the NIH salary cap the application will not be processed.

Is tuition for graduate students an allowable expense under this program?
Yes, tuition for graduate students is an allowable expense. This expense should be in proportion to the student's time on the project and should be listed in the Other Expenses category and on the Budget Justification tab of the Budget Template Form.

Are subcontracts allowed to a collaborator at a non-invited institution? How much of the award can be subcontracted?
Yes, subcontracts are allowed to institutions not on the invited institution list. Only the administrative PI needs to have a primary appointment at an eligible institution. The majority of awarded funding should be used to support research at the nominating institution. Budgets for large sub-contracts (amounts greater than what is budgeted for at the recipient institution) will be heavily scrutinized and must be properly justified.

What is the difference between the Authorized Institutional Representative and the Institutional Officer to Receive Funds?
Depending on the institution, the Office of Sponsored Programs (or similar grants management department) will sign off on the application to ensure that the statements contained in the application are true and complete, that the terms of the award are understood, and that you and the Institution have met the eligibility requirements. The

Institutional Officer to Receive Funds is typically within the finance or accounting office. Please check with your institution to determine who should certify the application.

Where do I find my Institution's Tax ID?
Please contact your Office of Sponsored Programs for this number.

How do I access the Online Application?
Applicants will submit their proposals in the HRiA Award Manager: https://hria.us-1.smartsimple.com/.

What will be asked in the Online Application?
Detailed information on what information is required within the online application can be found in the Application Instruction section of the Program Guidelines.

Post Award

If I am offered the Award but cannot accept it, may it be transferred to a collaborator or other individual significantly involved in the project?
No , the grant can only be awarded to the PI or multi-PIs who originally submitted the grant application.

If I apply and do not receive an Award, may I apply in future years? Will I be at a disadvantage if I reapply?
Yes, unsuccessful Transformational program Applicants will be allowed to resubmit one time in the subsequent cycle. There is no disadvantage to reapplying.

I was given more funding than I had budgeted. How should I proceed with spending on my award?
On occasion, payments may be greater than the original budgeted amount to meet disbursement requirements of the Funder. However, Awardees are still expected to make expenditures in alignment with their original budget, not the actual payment made. Awardees will not need to count the extra funds as carryover into subsequent years.
